

Laser Genesis Post-Treatment Instructions

Laser Genesis Post Treatment Instructions

- Please avoid direct sun exposure for 24 hours after your Laser Genesis treatment
- Apply recommended sunscreen EVERY day
- You may experience mild redness for 1-2 hours after your Laser Genesis treatment.
- You may feel a "tightening" of your skin after your Laser Genesis treatment.
- Improvements in your skin typically appear half way through your series of 6 or more. Be patient; it takes time for the body create those changes in your skin.
- We recommend at least 6 treatments for optimal results. The best results from your Laser Genesis treatment will not occur with just one or two treatments
- Avoid hot tubs, saunas & spas for 48 hours after your Laser Genesis treatment
- You may apply makeup immediately after your Laser Genesis treatment, as long as there is no crusting or blistering
- It is rare for blistering to occur. However, should it occur please contact our office to let us know this has happened. In the meantime -
 - Avoid sun exposure
 - Keep the area covered
 - Apply antibiotic ointment twice daily
 - For best results from your Laser Genesis treatment, please continue daily use of your prescribed skin care products. It will also be VERY important to stay on these products indefinitely to maintain your great results from your Laser Genesis treatment.
